

Phase 1 Entity Relationship Diagram

Every Phase 1 table from Blueprint v2.0 §20, as modelled in Implementation Guide V2 — the source P2-BE-02 builds the Prisma schema from.

PK primary key **FK** foreign key **UK** unique constraint **||—o||** one to many **||o—||** one to one, optional on the left **tenantid** is on every tenant-scoped table and is deliberately not drawn — it is a scoping column enforced in application code (§26), not a Postgres foreign key
