

WHAT HAPPENED

Metric	Value	vs prev. period	Source / provenance
QR scans	8,200	+18.2%	POSTGRES · \$16 scan events
Offers claimed	4,300	+15.7%	POSTGRES · \$16 claim events
Rewards redeemed	1,870	+12.4%	POSTGRES · \$16 redeem events
Unredeemed claims	2,430	—	Derived — claims — redemptions
Revenue attributed	\$52,500	+20.6%	ATTRIBUTED · merchant-validated coupons (\$16)

KEY FINDINGS

- Redemptions are up 12.4% — but 2,430 claimed rewards were never used. Closing that gap is the biggest lever on this page.
- Fans stay in until the weak step — only 43% of claims become redems.
- Washington, DC alone is 24% of all scans.
- One offer drives 44% of all redemptions — 20% Off Under Armour.
- Maya Torres converts claims 1.4× the roster average — route the next QR drop through the top of this table.

THE FUNNEL — SCAN TO REDEMPTION

Stage	Definition	Fans	Step conv.	From scan	Drop-off
Scan	fan opened the QR	8,200	—	100%	—
Landing	reward page loaded	6,410	78%	78%	" 1, 7 9 0
Claim	reward saved to phone	4,300	67%	52%	" 2, 1 1 0
Redeem	shown at the venue	1,870	43%	23%	" 2, 4 3 0

22.8% of scans end in a redemption. Weakest step: Redeem (flagged).

TREND — CUMULATIVE CLAIMS VS REDEMPTIONS

Period	Claims	Redemptions	Redemption rate	Unredeemed gap
May 1	95	60	63.2%	35
May 8	520	320	61.5%	200
May 15	1,390	780	56.1%	610
May 22	2,760	1,320	47.8%	1,440
May 31	4,300	1,870	43.5%	2,430

The gap column is claimed-but-unused reward — the number the headline tracks.

WHERE — SHARE OF SCANS

Location	Share of scans
Washington, DC	24%
Baltimore, MD	18%
Silver Spring, MD	12%
Atlanta, GA	9%
Kigali, RW	7%

Resolved in the worker at city level — the fan IP is never stored.

WHAT FANS TOOK — TOP OFFERS

Offer	Redemptions	Share of all redemptions
20% Off Under Armour	820	44%
\$5 Off Any Meal	560	30%
Free Drink	310	17%

Ranked by redemptions, not claims — what fans actually used.

WHO DROVE IT — ATHLETE PERFORMANCE

Athlete	Data quality	Views	Eng.	Claims	Redeems	C l a i m!' r e d e e m	Score
Maya Torres Basketball · Georgetown	verified	212,400	8.4%	1,510	910	60%	96

Roster total / average	—	583,500	—	4,300	1,870	43%	—

Views & engagement from platform APIs with per-row quality labels (§22); claims & redemptions are our §16 event rows; Score is the §14 Content Value Score.

METHODOLOGY

- Scan, landing, claim and redeem are separate §16 RewardEvent rows in Postgres — each funnel stage is a count of real events, never an estimate.
- Revenue is ATTRIBUTED through merchant-validated coupon redemptions, never payment-network data (§16); it is reported beside the counts and never summed with any other value.
- Athlete views and engagement come from platform APIs and carry a per-row data-quality label (verified / self-reported / estimated) per §22; claims and redemptions per athlete are our own event rows.
- Locations are resolved in the background worker at city level; the fan's IP address is never stored.
- Deltas compare against the previous period of the same length.
- Insight sentences are computed from the same dataset the tables print — they are derivations, not editorial copy.
